

To all members of the FCC: I have been an XM listener since shortly after Christmas 2003 and I love it! I utilize the news, information, weather, and traffic on a daily basis, and my family and I are looking forward to using these features when we visit Orlando in December. I pay a monthly fee for these services and should have the right to enjoy them. Please reject NAB's petition 04-160 and support my right and every other paying customers right to hear what programming that we choose to. The NAB and radio stations are upset that I am not listening to their commercials and promos...so what's next? Are they going to try and take away to watch the Sopranos because it is on commercial free HBO? Times are changing...it is a free country and you can't force me to have to listen to 22 minutes of commercials an hour just so I can hear my weather and traffic every 15 minutes. This is a no-brainer; please defeat this petition.
